Premium Double Braid Nylon Dock Lines

Gold and White / Superior Elasticity
Our gold and white "braided braid" dock lines have become the most easily recognized and popular available. Made from 100% nylon in jacket and core, they have superior shock absorbing elasticity and will not rot, kink or hockle under a load. Easy handling, these lines can be stored wet and are highly resistant to rot, oil, grease, gasoline and chemicals.

OUR BEST SELLING HYDROFOIL!

Speed-XP

our price
\$64.99

XP II Hydrofoil

Hydrofoil Stabilizer now made with Speed-XP™, an extreme performance hydrophilic material, making the world's fastest hydrofoil stabilizer even faster! Speed-XP™ is a clear hydrophilic (water-absorbing) material that is thermally bonded to the base polymer material of the hydrofoil. The surface of this material is hard when dry and looks like a new wax job-however the "magic" of its performance is released when the surface becomes wet... Speed-XP™ acts like a microscopic sponge when wet and will bind a very thin layer of water to the surface of the hydrofoil. The result is running water on water-a dramatic reduction in hydrodynamic drag and improved performance.
